Qualifiers Definitions

Qualifier **Qualifier Description** Notation The relative intensity of a characteristic ion in a sample analyte exceeded the acceptance criteria in subsection 11 (L)(1) with respect to the reference spectra, indicating interference When testing for pesticides, fungicides, herbicides, growth regulators, heavy metals, or residual solvents, the percent recovery of a laboratory control sample is greater than the acceptance limits in subsection (K)(2)(c), but L1 the sample's target analytes were not detected above the maximum allowable concentrations in Table 3.1 for the analytes in the sample The recovery from the matrix spike in subsection (K)(4) was: a. High, but the recovery from the laboratory M1 control sample in subsection (K)(2) was within acceptance criteria The recovery from the matrix spike in subsection (K)(4) was: b. Low, but the recovery from the laboratory M2 control sample in subsection (K)(2) was within acceptance criteria The recovery from the matrix spike in subsection (K)(4) was: c. Unusable because the analyte concentration was M3 disproportionate to the spike level, but the recovery from the laboratory control sample in subsection (K)(2) was within acceptance criteria The relative percent difference for the laboratory control sample and duplicate exceeded the limit in subsection R1 (K)(3), but the recovery in subsection (K)(2) was within acceptance criteria The recovery from continuing calibration verification standards exceeded the acceptance limits in subsection (J) V1 (1)(b), but the sample's target analytes were not detected above the maximum allowable concentrations in Table 3.1 for the analytes in the sample The sample is heterogeneous, and sample homogeneity could not be readily achieved using routine laboratory practices - Used to denote that the sample as-received could not be fully pre-homogenized in packaging prior to Q2 microbiology analysis Testing result is for informational purposes only and cannot be used to satisfy dispensary testing requirements Q3 in R9-17-317.01(A) or labeling requirements in R9-17-317
