Dr. Zodiak's Moonrock Infused/Enhanced Snowballz/Buckshots

Sample ID: 2510SHZ0208.0842

Strain: Wedding Cake

Matrix: Concentrates & Extracts

Type: Moon Rock Extraction Method:

Sample Size: ; Batch: 3,637.38 g

Harvested: 07/02/2025

Manufactured: 10/08/2025 Collected: 10/08/2025, 12:30 PM

Received: 10/08/2025

Completed: 10/13/2025 Batch#: WC100825

External Lot ID: Sour Dubs.B19B.27.2025 , Client 010125.ISO

Nirvana center

Lic. # 0000156ESTDP70697204

B 1	Potency testing, is below the limit of quantitation
B 2	Below the maximum allowable concentration
D1	The limit of quantitation and the sample results were adjusted to reflect sample dilution
11	The relative intensity of a characteristic ion in a sample analyte exceeded the acceptance criteria in subsection (L)(1) with respect to the reference spectra, indicating interference
L1	When testing for pesticides, fungicides, growth regulators, mycotoxins, heavy metals, or residual solvents, the percent recovery of a laboratory control sample is greater than the acceptance limits in subsection (K)(2)(c), but the sample's target analytes were not detected above the maximum allowable concentrations in Table 3.1 for the analytes in the sample
M 1	The recovery of the matrix spike was high, but the recovery from the laboratory control sample in subsection (K)(2) was within acceptance criteria
M 2	The recovery of the matrix spike was low, but the recovery from the laboratory control sample in subsection (K)(2) was within acceptance criteria
М3	Unusable because the analyte concentration was disproportionate to the spike level, but the recovery from the laboratory control sample in subsection $(K)(2)$ was within acceptance criteria
M 4	The analysis of a spiked sample required a dilution such that the spike recovery calculation does not provide useful information, but the recovery from the associated laboratory control sample in subsection (K)(2) was within acceptance criteria
M 5	The analyte concentration was determined by the method of standard addition, in which the standard is added directly to the aliquots of the analyzed sample
N 1	A description of the variance is described in the final report of testing according to R9-17-404.06(B)(3)(d)(ii)
R 1	The relative percent difference for the laboratory control sample and duplicate exceeded the limit in subsection (K)(3), but the recovery in subsection (K)(2) was within acceptance criteria
R 2	The relative percent difference for a sample and duplicate exceeded the limit in subsection
V 1	The recovery from initial or continuing calibration verification standards is greater than the acceptance limits in subsection (H)(2) or (J)(1)(b) as applicable, but the sample's target analytes were not detected above the maximum allowable concentrations in Table 3.1 for the analytes in the sample
Q1	Sample integrity was not maintained
Q2	The sample is heterogeneous, and sample homogeneity could not be readily achieved using routine laboratory practices
Q3	Testing result is for informational purposes only and cannot be used to satisfy dispensary testing requirements in R9-17-317.01(A) or labeling requirements in R9-17-317
